SUMMARY

Informatics Management graduate (GPA 3.70/4.00, Best Graduate 2026) and BNSP-certified Application Programmer & Database Administrator. Experienced in designing double-entry ledger engines, architecting full-stack & AI-assisted applications, and engineering deterministic data validation pipelines. Proficient in Java (Spring Boot), TypeScript/JavaScript (Next.js, React), Python, and PostgreSQL/MySQL, with a focus on clean database schemas, concurrency control, and robust software architecture.

EDUCATION

Politeknik LP3I Jakarta Sept 2023 – Aug 2026
Diploma (D3) in Informatics Management, GPA 3.70/4.00
- Best Graduate of Informatics Management 2026; Semifinalist, National Environmental University Debating Championship Festival (LIKE 2), Ministry of Environment and Forestry.

SMKN 2 Kota Bekasi Jul 2020 – May 2023
Software Engineering Major (RPL), GPA 89.31
- Top 2 Graduate of Software Engineering Major; completed 3-year vocational curriculum in software development, algorithms, and relational databases.

TECHNICAL PROJECTS

CERMAT: Core-Banking Ledger Engine | Java 17, Spring Boot 3, PostgreSQL, Docker 2026
- Architected a double-entry financial ledger backend enforcing debit-credit equilibrium with kernel-level triggers on append-only journal tables, preventing balance duplication and tampering.
- Eliminated race conditions and transfer deadlocks under concurrent requests by implementing deterministic pessimistic row locking (SELECT ... FOR UPDATE ORDER BY id) and SHA-256 payload idempotency.
- Engineered 16 dynamic balance shards for central system cash accounts, reducing lock queue contention and increasing deposit throughput by +30.9%; verified by 104 automated unit and stress tests (92% JaCoCo coverage).

TETHER: Telemetry Integrity Gate & Signal Triage | Python, Scikit-Learn, Streamlit, Pandas 2026
- Engineered a CPU-first signal validation gate for motorsport time-series telemetry, segmenting data into 64-sample windows with robust feature extraction (derivatives, missingness, flatline metrics).
- Combined deterministic integrity rules (detecting signal dropout and stuck sensors) with a compact Random Forest classifier (94.5% macro F1 across 6 fault patterns) and defensive CSV schema verification.
- Built an automated triage pipeline categorizing sensor reliability into Healthy, Alert, and Review with zero external API dependencies and deployed interactive Streamlit dashboard.

Lectura AI: Academic Copilot & Cognitive Learning Engine | Next.js 16, TypeScript, Google Gemini AI, Zod, Tailwind CSS 2026
- Architected an academic copilot integrating Google Gemini 3 Flash to transform lecture materials into structured 15-minute learning modules, exam trap predictions, and Pareto cram schedules.
- Enforced strict JSON schema validation via Zod with resilient offline graceful fallbacks, achieving sub-2s response latency and 100% TypeScript type safety with zero client-side layout shifts.

Web-Based CRM & Alumni Tracer Study System | PHP, CodeIgniter 3, MySQL, Bootstrap 2026
- Designed and delivered a centralized institutional information system with 5+ modules (alumni tracking, data intake, analytics reporting) on a normalized 7+ table relational MySQL database schema.
- Digitized paper-based workflows across 5 physical record formats into 1 portal, conducted user requirement validation, and successfully deployed to active staff at English Language Programs (ELP).

PROFESSIONAL EXPERIENCE

PT Erasoft Teknologi Indonesia Feb 2026 – Mar 2026
System Implementor (Internship)
- Supported deployment, module configuration, and integration testing of a .NET-based enterprise accounting application across 5+ core modules including General Ledger.
- Identified and diagnosed software workflow and database configuration issues for 3 client users through systematic root-cause troubleshooting.
- Authored comprehensive 3-page technical setup and installation documentation, cutting client onboarding and deployment time from 60 minutes to 20–30 minutes.

PT Kingtan Technology Corp. Sep 2022 – Dec 2022
Front-End Developer (Internship)
- Collaborated in a 4-person engineering team to translate approved Figma UI/UX specifications into 5+ responsive web pages using HTML, CSS, JavaScript, and PHP.
- Ensured cross-browser compatibility, responsive mobile layouts, and seamless form data handling ahead of project release deadlines.

PT Rizki Asa Buana Oct 2025 – Dec 2025

Warehouse Operations & Systems Admin (Internship)

- Processed 300+ inventory and dispatch transactions with 100% data integrity using internal enterprise management software.
- Reconciled monthly warehouse ledger balances, identifying and resolving 30–45 physical-to-system stock discrepancies.

LEADERSHIP & ORGANIZATIONAL EXPERIENCE

Student Executive Board (BEM), Politeknik LP3I Jakarta Bekasi Campus Dec 2024 – Dec 2025

Chairman (President of Student Body)

- Directed an 11-member cabinet across 5 divisions, managing IDR 30M+ budget and executing 10+ campus initiatives engaging 150+ student participants.
- Served as primary liaison between student body and campus leadership, driving conflict resolution, governance policy, and operational planning.

TECHNICAL SKILLS & CERTIFICATIONS

Languages: Java (17), TypeScript, JavaScript, Python, PHP, SQL, HTML5, CSS3
Frameworks & Runtimes: Spring Boot 3, Next.js 16, React 18/19, Node.js, CodeIgniter 3, Tailwind CSS, Streamlit
Databases & Systems: PostgreSQL, MySQL, Supabase, Flyway, Relational Schema Design, Query Optimization, Concurrency Control
Developer Tools: Git, GitHub, Docker, RESTful APIs, Swagger/OpenAPI, Postman, Maven, Vite, Linux (bash), Scikit-Learn, Zod
Certifications: Application Programmer (BNSP, 2023); Database Administrator (BNSP, 2025); Junior Web Developer (BNSP, 2023); Associate Data Scientist (Institut Teknologi Bandung, 2023)
Languages Proficiency: English (TOEIC 945, Professional Working Proficiency); Indonesian (Native)
