

SYUBY ALWI AKBAR ATTALA

Full Stack Developer |Backend & System Engineer |Mobile App Developer

Bekasi, Indonesia | +62 895-1985-0089 | syubyattala806@gmail.com | linkedin.com/in/syuby-alwi-akbar-attala | github.com/syubidin

SUMMARY

Informatics Management graduate (2026) with practical experience building high-integrity backend systems (Java 17, Spring Boot 3, PostgreSQL) and full stack web applications (PHP, CodeIgniter, Laravel, MySQL), complemented by enterprise .NET accounting system implementation. Proven capability in architecting double-entry core banking ledgers, pessimistic concurrency control, and automated reconciliation with 92% test coverage. BNSP-certified Junior Web Developer & Junior Database Administrator, and ITB-certified Associate Data Scientist. Former BEM Chairman. Seeking an entry-level Backend Engineer, Full Stack Developer, or Software Engineer role.

PROJECTS

CERMAT: Core-Banking Ledger Engine (Backend & Systems) *2026*

Independent Project | github.com/syubidin/cermat

- Engineered a high-integrity core-banking ledger engine enforcing double-entry bookkeeping with PostgreSQL kernel triggers, guaranteeing mathematical balance invariance and append-only immutability.
- Implemented atomic idempotency controls (INSERT ... ON CONFLICT DO NOTHING) and deterministic pessimistic locking (ORDER BY id), eliminating race conditions and deadlocks across concurrent transfers.
- Optimized high-volume cash deposits via 16-shard dynamic balance partitioning, reducing lock queue contention and increasing throughput by +30.9% (132 to 173 req/s).
- Built automated partner CSV reconciliation engine with anti-formula injection defenses and runtime fraud detection rule engine.
- Achieved 92% code coverage across 104 automated unit, integration, and stress tests (Mockito & JaCoCo), mathematically proving zero balance underflow under 150 concurrent requests..

Web-Based CRM & Alumni Tracer Study System (Full Stack) *2026*

Final Year Project — Politeknik LP3I Jakarta | github.com/syubidin/elp-crm

- Developed a full stack CRM web app (PHP/CodeIgniter 3 + MySQL) covering 5+ core modules: data input, alumni tracking, and reporting.
- Designed the relational database schema (7+ tables) and responsive UI, translating institutional requirements into functional features.
- Coordinated with institution staff across 3+ validation sessions to confirm requirements and improve usability.

EXPERIENCE

System Implementor (Internship) *Feb 2026 – Mar 2026*

PT Erasoft Teknologi Indonesia

- Supported implementation of a .NET-based accounting application across 5+ modules, including General Ledger and other core accounting functions.
- Assisted module configuration, system testing, and troubleshooting to align the application with client business processes and document setup steps.

Warehouse Admin (Internship) *Oct 2025 – Dec 2025*

PT Rizki Asa Buana

- Processed 300+ goods request forms via internal digital systems, maintaining 100% data accuracy.
- Created 100+ delivery notes and supported monthly stock reconciliation and data cross-checking.

Front-End Developer (Internship) *Sep 2022 – Dec 2022*

PT Kingtan Technology Corp.

- Built a company profile website (HTML, CSS, JavaScript, PHP), converting approved Figma designs into 5+ functional, responsive pages.
- Collaborated with a 4-person team of developers and designers to deliver the project on schedule.

LEADERSHIP & ORGANIZATIONAL EXPERIENCE

Chairman, Student Executive Board (Ketua BEM) *Dec 2024 – Dec 2025*

Politeknik LP3I Jakarta Kampus Bekasi

- Led 5+ divisions and coordinated 10+ academic, social, and organizational programs at the campus level.
- Served as the main liaison between students and campus management, resolving cross-team issues.

Chairman, English Club *Jan 2022 – Jan 2023*

SMKN 2 Kota Bekasi

- Guided weekly English Club sessions for 20+ members, improving speaking, debating, and public communication skills.

EDUCATION

Diploma in Informatics Management | GPA: 3.70/4.00 *Sept 2023 – Aug 2026*

Politeknik LP3I Jakarta

- Semifinalist, National Environmental University Debating Championship Festival LIKE 2 — Kementerian Lingkungan Hidup dan Kehutanan.
- Best Graduate of Informatics Management 2026.

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, Bootstrap, Tailwind, React Native, Flutter, SDLC, Responsive Design, Cross-Browser Compatibility
Backend: PHP, CodeIgniter, Laravel, Python, Java, Spring Boot 3, C++; familiar with Node.js fundamentals
Database & API: MySQL, PostgreSQL, Supabase, Flyway, Database Schema Design, RESTful APIs, OPEN API/Swagger
Tools & Platforms: Git, Docker, Docker Compose, JaCoCo, Postman, Maven, Figma Fundamentals (UI/UX Design), Linux basics, Microsoft Office 365
Other: UI/UX Principles, Data Analysis Fundamentals, AI-Assisted Development (ChatGPT, Gemini, Claude)

SOFT SKILLS

- Team Collaboration & Cross-Functional Coordination
- Leadership
- Problem Solving
- Communication & Stakeholder Coordination
- Adaptability

CERTIFICATIONS

- Associate Data Scientist — Institut Teknologi Bandung (ITB)
- Junior Web Developer — BNSP (Badan Nasional Sertifikasi Profesi)
- Junior Database Administrator — BNSP (Badan Nasional Sertifikasi Profesi)
- Application Programmer — BNSP (Badan Nasional Sertifikasi Profesi)
- Tenaga Operasi Komputer — BNSP (Badan Nasional Sertifikasi Profesi)
- Certification of Competence Project Based Learning — PT Bangun Karya Abadi

LANGUAGES

English: Professional Working Proficiency (TOEIC 945) | Indonesian: Native
